Public Member	At Large	David B. Swanson, Ph.D
Resident Physicians	At Large At Large At Large	Jennifer DeKraker, M.D. Jason A. Etheredge, M.D., Ph.D. Rami Kilani, M.D.
Student Representatives	AAMC Organization of Student Representatives AMA Medical Student Section American Medical Student Association	Robert P. Hollowell, III Sandeep K. Krishnan Carl E. Fisher
NRMP Staff	Associate Director and Manager of the Specialties Matching Service Director of Research	Peggy Geigher, M.P.A. Philip Szenas, M.A.
Support	Systems Project Manager	Ellen Varshavsky

Active Applicant	An active applicant is one who submits a certified rank order list of programs.
Applicant Type	<p>The NRMP classifies SMS applicants into 6 applicant types:</p> <ul style="list-style-type: none">• Graduates of U.S. allopathic medical schools. A graduate of a Liaison Committee on Medical Education (LCME) accredited U.S. allopathic school of medicine.• Graduates of Canadian medical schools. A graduate of a Committee on Accreditation of Canadian Medical Schools (CACMS) accredited Canadian school of medicine.• Graduates of osteopathic medical schools. A graduate of an American Osteopathic Association (AOA) accredited school of medicine.• Graduates of Fifth Pathway programs.• U.S. citizen graduates of international medical schools.• Non-U.S. citizen graduates of international medical schools.
Non ACGME accredited	Programs or specialties not accredited by the Accreditation Council for Graduate Medical Education (ACGME)
NRMP	National Resident Matching Program
RRC	Residency Review Committee

NRMP Specialties Matching Service: Program Results for 2008 Appointments.....	33
---	----

About the Specialties Matching Service

The National Resident Matching Program (NRMP) is a private, not-for-profit corporation established in 1952 to optimize the rank order choices of applicants and program directors. The NRMP is not an application processing service; rather, it provides an impartial venue for matching applicants' and programs' preferences for each other consistently.

In addition to the Main Residency Match for first and second year residency positions, the NRMP's Specialties Matching Service (SMS) conducts matches for advanced residency and fellowship positions. The NRMP conducted its first fellowship match in 1984 for Colon and Rectal Surgery, and now provides services for 35 sub-specialties within 21 separate matches. A full list of the specialties participating in the SMS for the 2008 appointment year can be found in Figure 1.

The specialty matches occur throughout the year, and each requires its own registration process with the NRMP. Fellowship positions generally begin in July. Because fellowship matches have appointments that start anywhere from 7 to 14 months after their match days, we have organized this report based on appointment year and not match year.

For more information about the NRMP's Specialties Matching Service, please visit: www.nrmp.org/fellow/.

Data and reports for the NRMP's Main Residency Match can be found at: www.nrmp.org/data/. Instructions on how to request additional data also are provided.

Introduction

Prior to 2002, the NRMP published the results of each fellowship match in paper form and distributed the reports to participating programs. With the launch of the NRMP's web-based Registration, Ranking, and Results System in 2002, the data no longer were printed but remained available to participating programs via the web. Because of the interest in fellowship match data, the NRMP is again publishing a paper-based report in a combined specialty format.

This report summarizes all fellowship matches conducted by the NRMP's Specialties Matching Service (SMS). Specifically, data are provided for matches conducted in 2007 (and early 2008) for appointments beginning in July 2008. In addition, trend data over the past five years show the number of programs, positions, and match rates by specialty. Lastly, the number of positions offered and filled for each participating program is presented at the end of this report.

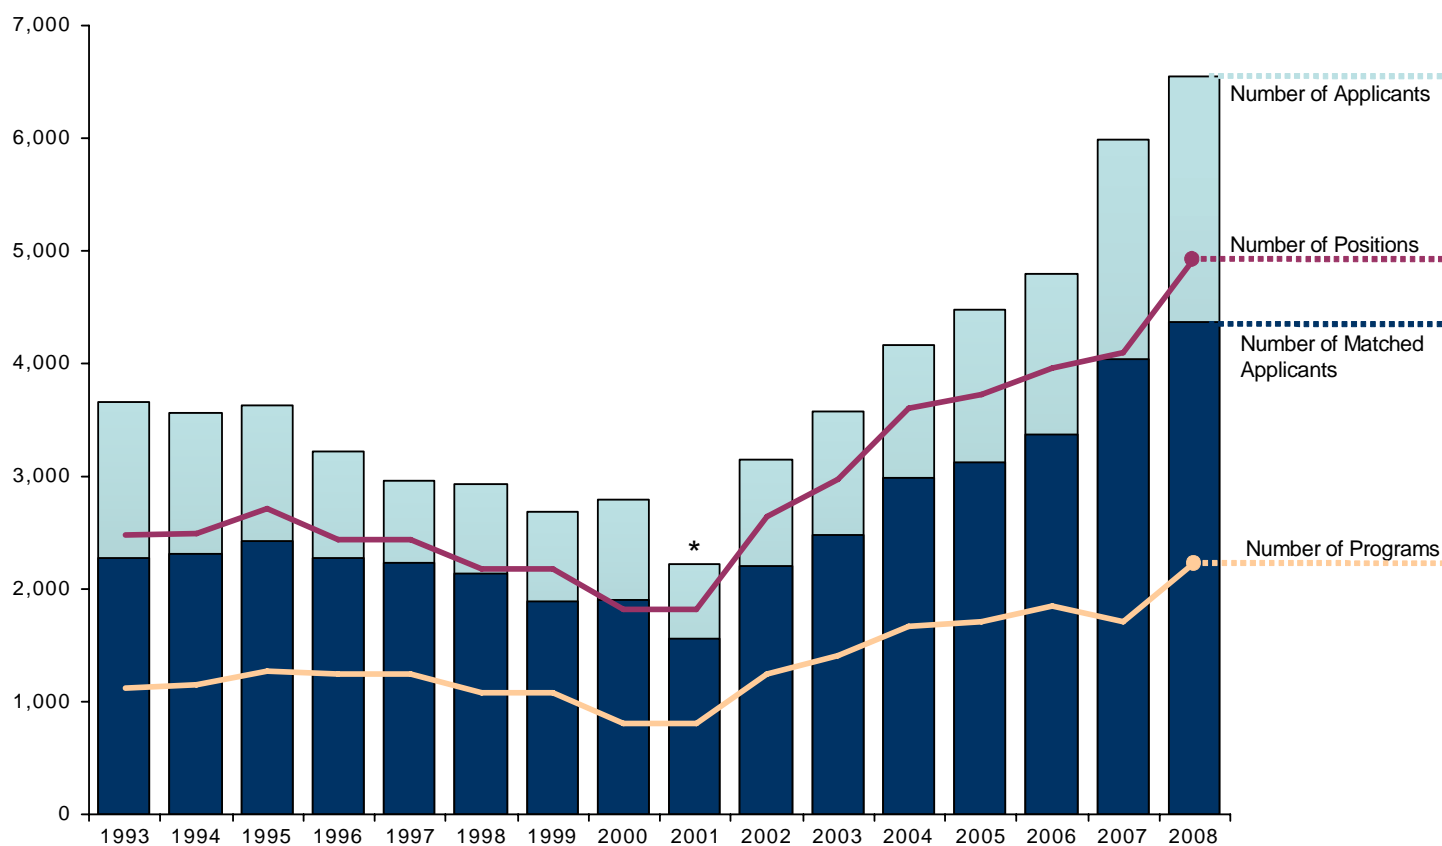

The 2008 appointment year was the largest in the history of the SMS. The matches included:

- 2,239 programs within 35 specialties offering 4,931 fellowship positions
- Of those positions, 4,371 (88.6%) were filled
- Of the 2,239 participating programs, 1,822 (80.3%) filled all their positions
- 6,543 applicants participated in at least one of the fellowship matches and 4,371 (66.8%) received a match

Questions regarding the NRMP's Specialties Matching Service should be directed in writing to:

Mona M. Signer, Executive Director
National Resident Matching Program

 Washington, DC 20037-1127
nrmp@aamc.org

Figure 2 Number of Applicants and Programs Participating in the Specialties Matching Service (SMS) by Appointment Year, 1993-2008

*The decline in 2001 is an artifact of several specialties changing their appointment years.

Table 1

Table 1 provides a summary of the SMS fellowship matches for appointment year 2008.

Using Allergy and Immunology as an example:

- The first two columns show that 131 U.S. allopathic medical schools graduates, and 182 total applicants, ranked at least one Allergy and Immunology program.
- The next two columns show that a total of 107 positions were offered in this specialty by 71 programs.
- The next two columns show that 82 of the 107 positions offered in Allergy and Immunology were filled by U.S. allopathic graduates and 103 were filled by all applicants.
- The percent filled (number filled/positions offered) can be found in the next two columns. Of the fellowship positions offered in Allergy and Immunology, 76.6 percent were filled by U.S. allopathic graduates and, overall, 96.3 percent were filled.
- The ranked positions columns show that collectively U.S. allopathic graduates ranked those Allergy and Immunology programs 753 times and the total number of ranks for all applicants was 941.
- The last column indicates that 3 Allergy and Immunology programs had at least 1 unfilled position after the Match.

Of the 35 participating specialties, 22 (62.9%) filled over 90 percent of the positions offered and 6 (17.1%) filled less than 75 percent of the positions offered. Five specialties (14.3%) filled 75 percent or more of the positions offered with graduates of U.S. allopathic medical schools and 8 specialties (22.8%) filled 50 percent or less of their positions offered with U.S. allopathic graduates.

TOTAL

*Specialties are grouped by Residency Review Committees (RRCs). Some specialties are under the auspices of multiple RRCs and some specialties (or programs within a specialty) are not accredited by the ACGME. In these cases the fellowship programs are grouped under the RRC with the preponderance of programs (for multiple RRCs) or the RRC that would have responsibility for the programs if accredited.

**Non ACGME accredited.

++Applicants can rank multiple specialties within the combined specialties matches. In addition, a small number of applicants (5-20) participate in more than one fellowship match within a single appointment year.

+++Graduates of U.S. allopathic medical schools.

Table 2

Table 2 shows the number and percent of matches in each specialty by applicant type. Of the specialties offering at least 30 positions:

- Interventional Radiology had the highest proportion filled with *U.S. allopathic graduates* (84.3%) and Abdominal Transplant Surgery had the lowest (42.9%). The specialties of Reproductive Endocrinology, Pediatric Surgery, Hand Surgery, and Foot and Ankle Orthopaedics filled 80 percent or more of their positions with graduates of U.S. allopathic medical schools.
- A larger than average percentage of *osteopathic graduates* matched to the specialties of Primary Care Sports Medicine, Foot and Ankle Orthopaedics, and Surgical Critical Care.
- A larger than average percentage of *Canadian graduates* matched to the specialties of Pediatric Surgery, Abdominal Transplant Surgery, and Minimally Invasive & Gastrointestinal Surgery.
- A larger than average percentage of *U.S. international medical school graduates* matched to the specialties of Clinical Oncology and Primary Care Sports Medicine.
- A larger than percentage average of *Non-U.S. international medical school graduates* matched to the specialties of Abdominal Transplant Surgery and Clinical Oncology.

**Non ACGME accredited.

Tables 3

The ratios of fellowship positions to active applicants from 2004 through 2008 are provided in Table 3 and shown graphically in Figure 3. Active applicants are defined as those who submitted certified rank order lists. The red line in Figure 3 indicates the point at which there are equal numbers of positions and applicants.

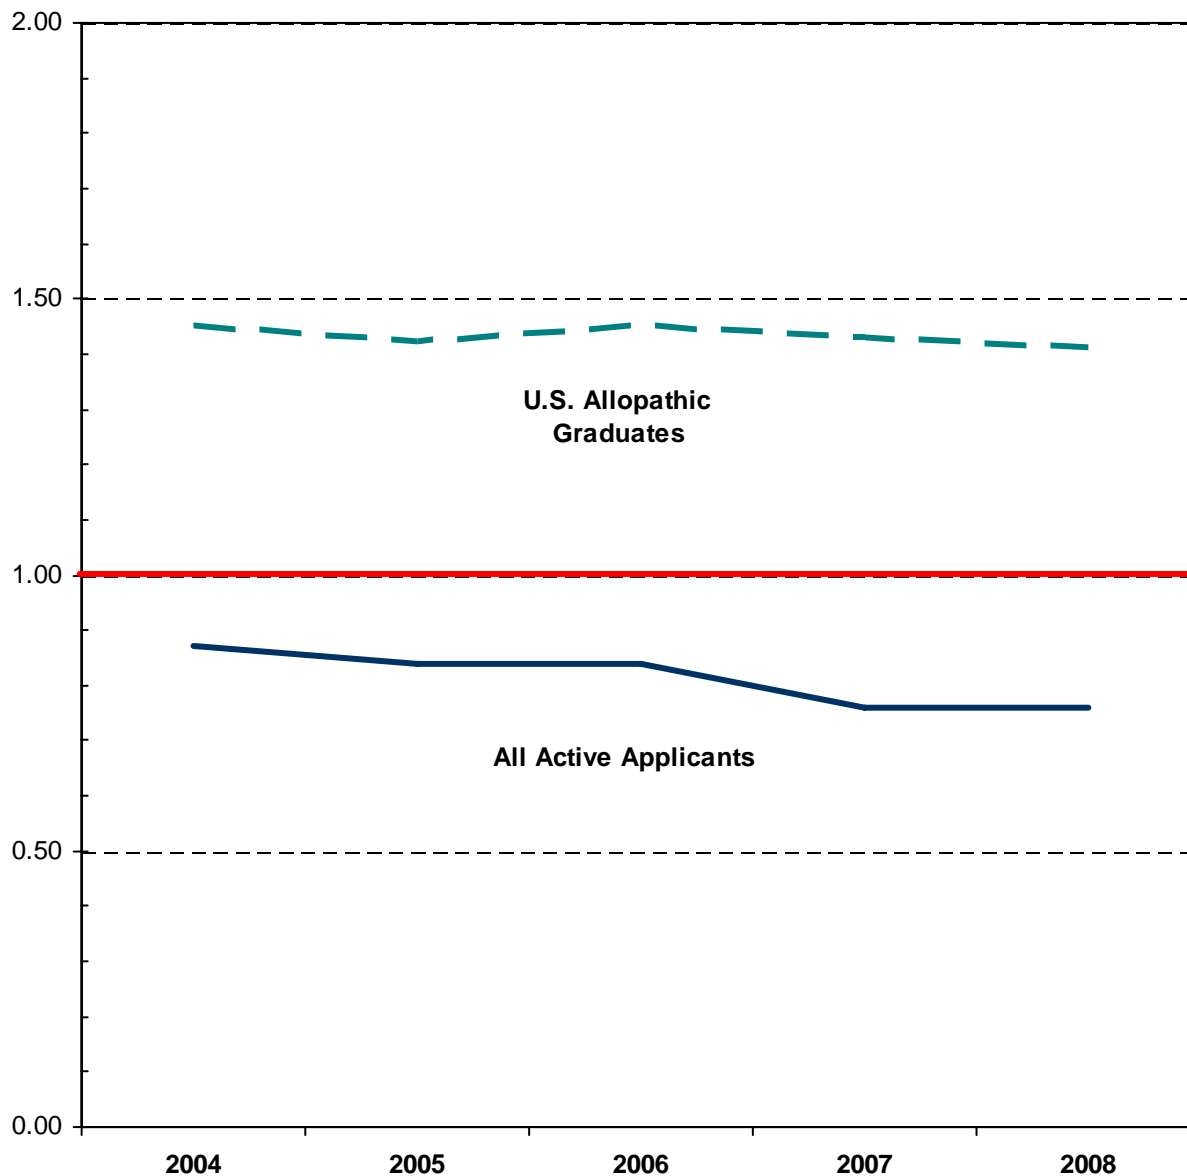

- The ratio of fellowship positions per *active U.S. allopathic graduates* remained fairly constant over the period ranging from 1.45 positions per applicant in 2004 to 1.41 positions per applicant in 2008. Across all five years, there were more fellowship positions offered than there were U.S. allopathic graduate applicants.
- The ratio of fellowship positions to *total active applicants* has decreased slightly over the period; from 0.87 positions per applicant in 2004 to 0.75 positions per applicant in 2008. This decline reflects the fact that the increase in the number of applicants outpaced the increase in the total number of available positions over the period.

Table 3 Number of Positions per Active Applicants, 2004 - 2008

Year	Number of Positions	Active Applicants		Positions Per Active Applicants	
		U.S.		U.S.	
		Graduates*	All	Graduates*	All
2004	3,617	2,493	4,171	1.45	0.87
2005	3,753	2,645	4,479	1.42	0.84
2006	4,004	2,761	4,795	1.45	0.84
2007	4,573	3,207	5,985	1.43	0.76
2008	4,931	3,507	6,543	1.41	0.75

Note: Applicants who withdrew or did not rank programs are excluded.

*Graduates of U.S. allopathic medical schools.

Figure 3 Positions per All Active and Active U.S. Allopathic Graduate Applicants, 2004-2008

Tables 4

Table 4 provides a summary of the participants in the SMS fellowship matches between 2004 and 2008 by applicant type. The total number of registrants for the 2008 appointment year (7,212) increased 8.5 percent from the 2007 figure of 6,544, and the number of active applicants grew by 558 (a 9.3% increase). An active applicant is one who submits a certified rank order list of programs. Those increases can be attributed to both the addition of new specialties (Allergy and Immunology, Foot and Ankle Orthopaedics, and Pediatric Gastroenterology) and the increase in the number of applicants for some of the specialties participating over the entire period.

Applicants are grouped based on citizenship and medical school of graduation. For example, *U.S. allopathic graduates* are prior graduates of U.S. allopathic medical schools. *U.S. international graduates* are defined as U.S. citizens who are graduates of international medical schools, and *non-U.S. international graduates* are non-U.S. citizen graduates of international medical schools.

The increase between 2004 and 2008 in active applicants has not been uniform across applicant types. For example, active applicants who are non-U.S. international graduates rose by 91.5 percent while graduates of U.S. allopathic medical schools increased by only 40.7 percent. Active applicant groups that increased faster than the overall rate of 56.9 percent are identified in Table 4 with green arrows.

The trends in the numbers of active applicants and their match rates can be seen graphically in Figures 4.

▲ Denotes that the percentage increase in active applicants for this group was greater than the overall increase of 56.9% for all active applicants between 2004 and 2008.

Figure 4

Number of **Active Applicants** and **Percent Matched**, 2004 - 2008

Table 5

Table 5 displays trends between 2004 and 2008 in the numbers of positions offered in the fellowship matches by specialty, as well as the percent filled by U.S. allopathic medical school graduates and by all applicants. To provide a complete picture, the table includes all specialties that participated during the five-year period regardless of when they joined and whether they remained in the SMS.

Overall match rates for several specialties (e.g., Maternal-Fetal Medicine, Female Pelvic Medicine and Reconstructive Surgery, Hand Surgery, and Vascular and Interventional Radiology) have trended upward over the five year period while others (e.g., Thoracic Surgery, Gynecologic Oncology, and Child and Adolescent Psychiatry) have trended downward.

A graphical summary of the five year trends for each specialty listed in Table 5 can be found on the following pages.

*Specialties are grouped by Residency Review Committees (RRCs). Some specialties are under the auspices of multiple RRCs and some specialties (or programs within a specialty) are not accredited by the ACGME. In these cases the fellowship programs are grouped under the RRC with the preponderance of programs (for multiple RRCs) or the RRC that would have responsibility for the programs if accredited.

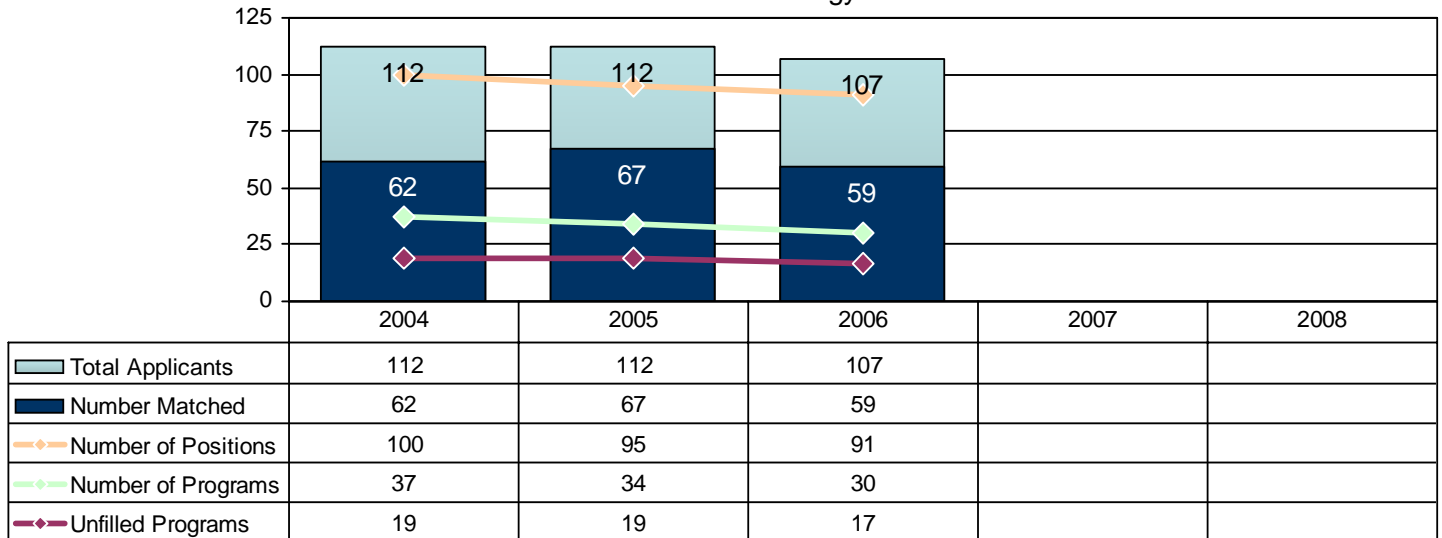

**Non ACGME accredited.

Specialties Matching Service: Program Results for 2008 Appointments

This section of the report lists every hospital that participated in the SMS, along with the number of positions offered and filled for each of the institution's programs.

Hospitals are arranged alphabetically within state. The listing includes the hospital name (abbreviated in some instances); the program code, which identifies each program; the quota (the number of positions offered by the program); and the number of applicants matched with that program.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: (1) the applicants preferred other programs having vacancies; (2) the applicants did not rank the program; or (3) the applicants had withdrawn from the Match. There are also three reasons why applicants may not be matched with their most preferred program: (1) the program was filled with applicants it preferred; (2) the program did not rank the applicant; or (3) the program had withdrawn from the match.

NRMP Program Code Structure

The NRMP program code is a **9-character** code based on the following criteria.

- The first four characters are the Institution Code.
- The fifth through the seventh characters represent specialty code obtained from the first three digits of the program's ACGME Code and designates the specialty (see below).
- The eighth character represents the program type: F – Fellowship program
- The ninth character represents the track:
 - 0 – first program/track in the specialty and program type at the institution
 - 1 – second program/track in the same specialty and program type at the same institution (i.e. 34th Street Clinic)
 - 2 – third program/track in the same specialty and program type at the same institution (i.e. Rural Clinic).

ACGME SPECIALTY CODES

421 Abdominal Radiology	427 Interventional Radiology	424 Pediatric Radiology
R21 Abdominal Radiology**	R27 Interventional Radiology**	R24 Pediatric Radiology**
