# NATIONAL RESIDENT MATCHING PROGRAM

## INTRODUCTION

The NRMP was established in 1952 to provide both applicants and residency program directors a fair opportunity to consider their options for appointment, to make reasoned decisions, and to have their decisions announced at a uniform time.

The first match was conducted in 1952 when 10,400 internship positions were available for 6,000 U.S. graduating seniors. By 1973, there were 19,000 positions in the match for just over 10,000 U.S. graduating seniors. Following the demise of internships in 1975, the number of first year post-graduate (PGY-1) positions in the match dropped to 15,700. The number of PGY-1 positions offered gradually increased through the 1994 Match, and then began to decline slowly until 1998. This year, a record high 21,659 positions were offered (Figure 1).

The increase in the total number of applicants since 1952 is more dramatic, starting with 6,000 in 1952 and rising to a high of 36,056 in 1999. After a decline of 5,052 applicants from 1999-2003, the number registered for the 2006 Match increased to 33,534, matching the 2000 total number and 1672 more than 2005.

The NRMP completed a total re-engineering of the matching process for the 2002 Match. The web-based Registration, Ranking, and Results (R3) System was launched in July 2001. It is completely paperless and allows applicants and programs to complete all match-related activities on-line including:

- registration, with applicants paying their registration fees on-line by credit card or electronic checking;
- rank order list entry; and
- obtaining Match results.

The R3 System is a user-based system rather than a program-based system. All participants are assigned a unique ID number, which they use again in matches in subsequent years. The System also relies almost exclusively on e-mail communications, which allows the NRMP to send messages to participants on short notice.

Beginning in 2002, the NRMP augmented the release of Match results on the web during Match Week with e-mail messages to applicants, program directors, and schools at critical times. In addition, the Registration, Ranking, and Results System is supported by an expanded pool of servers. Those two changes improved the performance of the application during peak times near the rank order list deadline and during Match Week.

The NRMP is managed by the Association of American Medical Colleges (AAMC). Operations are conducted in the AAMC's Division of Medical School Services and Studies.

Special data requests pertaining to this or prior matches should be directed in writing to:

## **TABLES 1 AND 2**

The 2006 Match was highly successful with higher program fill rates in most specialties. Tables 1 and 2 illustrate the trends in the numbers of positions and applicants participating in the Match during the past seven years. Many applicants in addition to U.S. senior medical students seek residency positions through the NRMP. The data for different applicant categories are shown in Table 2. U.S. foreign graduates are defined as U.S. citizens who are graduates of foreign medical schools, and non-U.S. foreign graduates are non-U.S. citizen graduates of foreign medical schools.

The total number of positions offered in the 2006 Match was 24,085, an all-time high. The number of PGY-1 positions increased by 205 (1.0 percentage points), but the number of PGY-2 positions decreased by 132 (5.2 percentage points). The growth in PGY-1 positions can be attributed primarily to Otolaryngology joining the NRMP. The PGY-2 decline is due primarily to Anesthesiology and Emergency Medicine programs offering more categorical programs that include the preliminary year of training.

The total number of registrants rose by 1,672 in 2006. The number of non-U.S. citizen foreign graduates who were active in the Match grew for the fourth year in a row to 6,442, a 16 percentage point increase (Figure 2). An active applicant is one who submits a rank order list of programs. The number of active U.S. citizen foreign graduates increased by 344 (16.5 percentage points). The higher numbers of foreign medical school graduates who submitted rank order lists resulted in declining match rates for both U.S. citizens (4.1 percentage points) and non-U.S. citizens (6.7 percentage points).

Earlier decreases in the participation of foreign medical school graduates followed shortly after July 1, 1998, when the Educational Commission for Foreign Medical Graduates (ECFMG) required successful completion of the Clinical Skills Assessment (CSA) examination for certification. The 2006 Match was the second for which the new USMLE Step 2 clinical skills examination replaced the CSA. In the months leading up to the 2005 Match, many foreign medical school students and graduates expressed concern about their ability to participate because of anticipated scheduling difficulties and delays in score reports. The significant increase in active foreign graduates in this year's Match may be due partly to the growing numbers who have passed the USMLE Step 2 clinical skills examination. The number of foreign graduates withdrawn in 2006 because they did not meet ECFMG examination requirements was 1,556, compared with 1,777 in 2005.

The number of active U.S. seniors increased for the third year in a row. This year, 289 more U.S. seniors were active than in 2005, an increase of 2.0 percentage points. For the first time, the number of U.S. seniors active in the Match exceeded 15,000. As in years past, U.S. seniors had the highest match rate; 93.7 percent (14,059) of the U.S. seniors who submitted rank order lists were matched to first-year positions. Adding the 161 seniors who matched to a PGY-2 position but not a PGY-1 position, 94.7 percent of U.S. seniors matched to at least one position.

Although the number of positions offered increased only slightly, the total number of active applicants grew by 1,367 (5.4 percentage points) to 26,715. Of those, 20,072 were matched to PGY-1 residency positions, 312 more than last year. Therefore, the match rate for all applicants decreased slightly to 75.1 percent (Figure 3).

### **TABLE 3**

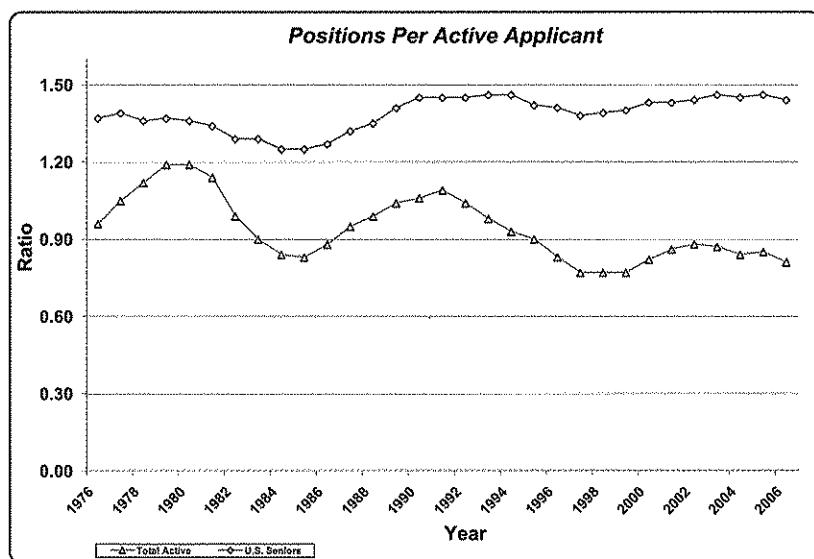

The ratios of PGY-1 positions to active applicants from 1976 through 2006 are shown in Table 3. Active applicants are defined as those who submitted rank order lists.

- In 2006, the ratio of PGY-1 positions per active U.S. senior remained almost constant with the previous five years at 1.44/1. The ratio declined from 2.0/1 in 1972 (not shown) to a low of 1.25/1 in 1984 and 1985. Since then it has fluctuated between 1.27/1 and 1.46/1.
- The ratio of PGY-1 positions to total applicants (rather than only U.S. seniors) is quite different and decreased slightly this year, reflecting the fact that the increase in the number of applicants was much greater than the increase in the total number of available positions.

**TABLE 3**  
**Ratio of PGY-1 Positions to Active Applicants**  
**1976 – 2006**

Year	Number of Positions	Active U.S. Seniors	Positions Per U.S. Senior	Active Total	Positions Per Active Application

## **TABLE 4**

Table 4 displays the match rates to PGY-1 positions for U.S. seniors, U.S. citizens trained in foreign medical schools, non-U.S. citizens trained in foreign medical schools, and other applicants (Canadian, osteopathic, Fifth Pathway, and U.S. physicians). Three of the four categories registered a decline in their match rate, which is the percentage of active participants who matched to PGY-1 positions.

- 93.7 percent of U.S. seniors were matched, the same as 2006.
- Canadian, osteopathic, Fifth Pathway, and U.S. physicians collectively matched at 57.6 percent, a decrease of 0.4 percentage points from the 2005 Match.
- The match rate for U.S. citizen graduates of foreign medical schools fell by 4.1 percentage points, the second consecutive year of decline.
- The percentage of non-U.S. citizen graduates of foreign medical schools who matched decreased by 6.7 percentage points, falling below 50 percent for the first time in five years.

## **TABLES 5 and 6**

Table 5 illustrates the numbers of positions offered in the Match by specialty, as well as the numbers filled by U.S. seniors and by an aggregate of all other applicants. Table 6 displays the same information in percentages.

- For the eighth consecutive year more than 20,000 matches were made to PGY-1 and PGY-2 positions, with an increase of 206 over 2005 and 2,571 for the eight-year period.
- The fill rate for all programs also rose in 2006, and at 93.1 percent is the highest ever.
- Otolaryngology, new to the Match this year, filled 98.1% of its positions, 92% with U.S. seniors.
- Anesthesiology continues its upward trend. 97.6 % of PGY-1 and 98.6% of PGY-2 positions were filled; overall, the number of positions filled by U.S. seniors was up 7.9 percentage points.
- Obstetrics-Gynecology, continuing an upward trend that began in 2004, filled 97.9% of its positions, up 3.2 percentage points from last year and 6.7 percentage points since 2003; U.S. seniors filled 72.4% of the positions, up by 4.9 percentage points from last year.
- Although Family Medicine put 50 fewer positions in the Match this year, it filled 32 more positions and took 6 more U.S. seniors.

Other specialties of note are:

- Specialties and specialty tracks with at least 10 positions in the Match and 100 percent fill rates:
  - Dermatology: PGY-1
  - Pediatrics-Primary: PGY-1
  - Pediatrics/Psychiatry/Child Psychiatry: PGY-1
  - Plastic Surgery: PGY-1
  - Radiation Oncology: PGY-1
  - Emergency Medicine: PGY-2
- Specialties with at least 10 positions in the Match and over 90 percent filled by U.S. Seniors:
  - Dermatology: PGY-1
  - Otolaryngology: PGY-1
  - Plastic Surgery: PGY-1
  - Radiation Oncology: PGY-1
  - Radiation Oncology: PGY-2

## **TABLES 7, 8, and 9**

Tables 7, 8, and 9 display the number of PGY-1 matches by specialty for three different groups: all applicants, U.S. seniors, and foreign-trained physicians. Foreign-trained physicians are U.S. citizen and non-U.S. citizen graduates of foreign medical schools, excluding Canadian, osteopathic, and Fifth Pathway applicants.

### **Generalist Specialties**

For the third time since the 1997 Match, the generalist specialties matched more U.S. seniors than the prior year. In 2006, 42.5 percent (5,975) of U.S. seniors who were active applicants matched to first-year residency positions in one of the generalist specialties. That number was 30 more applicants, but still a 0.6 percentage point decline from 2005. The generalist specialties are defined as:

- Family Medicine
- Internal Medicine, Internal Medicine-Pediatrics, Internal Medicine-Primary
- Pediatrics, Pediatrics-Primary

All of those specialties except Pediatrics and Internal Medicine-Primary matched more U.S. seniors in 2006 than in 2005.

- Ending eight consecutive years of decline, 1,123 (8.0%) of matched U.S. seniors will enter Family Medicine residency programs, an increase of 6 from 2006 but 1,217 fewer than in 1997.
- 3,127 (22.2%) of matched U.S. seniors will enter Internal Medicine, Internal Medicine-Pediatrics, or Internal Medicine-Primary residency programs, an increase of 23 from last year.
- 1,725 (12.3%) of matched U.S. seniors will enter Pediatrics or Pediatrics-Primary residency programs, an increase of 1 from last year.

Table 9 shows by specialty the number of U.S. citizen and non-U.S. citizen foreign-trained physicians who matched to PGY-1 positions. By far the largest percentage (37.6%) received positions in Internal Medicine. The next largest group was in Family Medicine, where foreign-trained physicians filled 20.3 percent of positions offered, a 0.5 percentage point increase from last year. Pediatrics was the third largest group with 8.4 percent.

## TABLE 10

Table 10 is displayed in two parts. Table 10a shows the number of programs ranked by U.S. seniors, and Table 10b reports the same information for all applicants. For example, an applicant ranking ten programs would contribute a count of ten to the total. Very competitive specialties are likely to have higher ratios of numbers of ranks per numbers of positions because applicants tend to rank more programs in those specialties.

The Ranked Positions column displays the total number of times a particular specialty was ranked. Using Anesthesiology PGY-1 for Total Applicants (the right side of the Table 10b) as an example:

- The first two columns show that 77 programs offered 552 Anesthesiology PGY-1 positions.
- The Ranked Positions Column shows that collectively all applicants ranked those Anesthesiology programs 5,694 times.
- The next column (No. of Ranks/Position) shows the ratio of the number of ranks to the number of positions was 10.3/1 (5,694/552).
- The next two columns show that 539 of the 552 offered Anesthesiology PGY-1 positions were filled for a fill rate of 97.6 percent.
- The last column indicates that 3 Anesthesiology programs had unfilled PGY-1 positions after the Match.

## TABLE 11

Table 11 was revised last year to provide more meaningful data by combining Tables 11a and 11b from previous editions of the Results and Data Book.

Formerly, Table 11a displayed by specialty the program choices made by matched and unmatched U.S. seniors. Table 11b showed the same information for independent applicants (U.S. Citizen Graduates of Foreign Medical Schools, Non-U.S. Citizen Graduates of Foreign Medical Schools, Canadian Applicants, Osteopathic Applicants, Fifth Pathway Applicants, and Previous U.S. Graduates).

Prior to 2004, Table 11 displayed the number of Positions per U.S. Senior and the number of Positions per Active Applicant. Those calculations were based upon the numbers of applicants who ranked the specialty as their Only Choice, First Choice, or Not First Choice. The table was revised to calculate the number of Positions per U.S. Senior and the number of Positions per Active Applicant. A column titled Positions per Independent Applicant (I.A.) was added to the table in 2005. In those calculations, the denominator now includes only those applicants for whom the specialty was the only or first choice.

Prior to the 2003 Match, this table also counted only PGY-1 positions, including preliminary positions in all specialties. In 2003, PGY-2 positions were added so that the table reflected the total number of positions offered within a specialty. Beginning in 2004, preliminary and transitional year positions were eliminated from the calculations. Thus, the numerator now consists of all positions in a specialty, minus preliminary positions. Currently, an applicant who ranked categorical Dermatology programs as well as advanced Dermatology programs is counted once under the "Dermatology Only Choice" column.

The table also shows the ratio of applicants choosing a specialty to the number of positions in that specialty. For example:

- 310 U.S. seniors ranked at least one Otolaryngology program. Otolaryngology was the preferred specialty for the 304 U.S. seniors for whom it was the only or first choice. With only 264 positions offered, the ratio of positions to U.S. senior applicants for whom it was the preferred choice was 0.9:1, indicating a competitive specialty with fewer positions than applicants.
- On the other hand, 192 U.S. seniors ranked at least one Physical Medicine and Rehabilitation program, and it was the only or first choice for 184 of them. With 352 positions offered, the ratio of positions to U.S. senior applicants was 1.9:1, indicating a much less competitive specialty with many fewer applicants than positions.

Although the ratios for U.S. seniors and the total applicant pool are similar in many specialties, there are some notable exceptions. In some specialties, the ratios for U.S. students were significantly higher than for all applicants combined, meaning all other applicants ranked those specialties much more frequently. For example:

Specialty	U.S. Senior Ratio	Total Applicant Ratio
Family Medicine	2.4	0.9
Physical Medicine & Rehab	1.9	0.8
Internal Medicine	1.7	0.7

**TABLE 11**

## **TABLE 12**

Table 12a examines the 86.9 percent of U.S. seniors who submitted rank order lists with only one specialty ranked. Table 12b displays the same information for independent applicants. As in Table 11, preliminary and transitional year positions no longer are used in these calculations because they do not represent a true "specialty choice".

The high percentage of unmatched applicants in such specialties as Dermatology, General Surgery, and Otolaryngology reflect the fact that there are significantly more applicants interested in those specialties than there are available positions. That disparity also is reflected in the high fill rates (Table 6) for the PGY-1 positions of the three specialties, which were 100 percent, 99.9 percent, and 98.1 percent respectively.

## TABLE 13

Table 13a displays the percent of U.S. seniors who matched to programs that were ranked by the students first, second, third, fourth, or fifth and lower. Only programs listed on applicants' primary rank order lists are used. In addition, each partner of a couple was credited with the highest rank on the rank order list of the program to which he/she matched since couples frequently rank the same program multiple times. Table 13b, which displays the same data for independent applicants, was added to the Results and Data Book in 2004.

Of all matches obtained from U.S. seniors' primary lists, 84.6 percent were to one of the first three choices. Approximately 60.1 percent were first choice matches, 15.5 percent were second choice, and 9.0 percent were third choice.

The percentage of matched independent applicants who obtained one of their top three choice programs was almost as high as that for U.S. seniors. More than one-half (50.4%) matched to their first choice programs, 19.1 percent matched to their second choice, and 11.2 percent matched to their third choice, for a total of 80.7 percent.

## TABLE 14

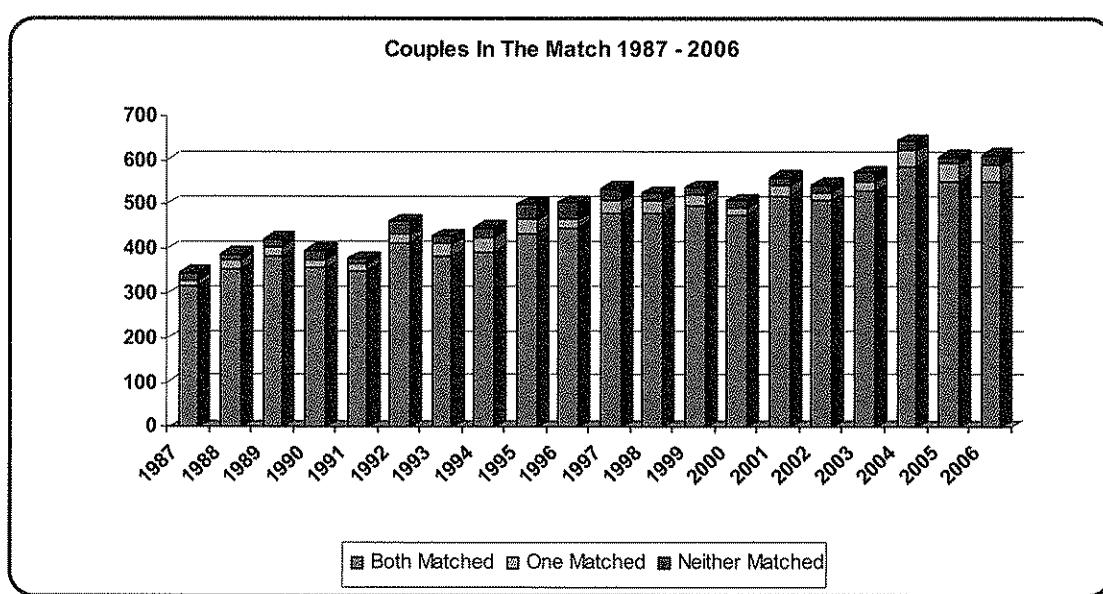

Couples have been able to participate together in the NRMP's Main Residency Match since 1984. The two partners identify themselves as a couple to the NRMP and submit rank order lists of identical length. The algorithm treats the two lists as a unit, matching the couple to the highest linked program choices where both partners match to programs on their lists.

Couples enjoy great success in the Match, with match rates above 90 percent every year since 1984. In 2006, the match rate for couples was 93.4 percent. More than 80 percent of couples are U.S. seniors, and their match rates are quite similar to those of their classmates, varying within 1 or 2 percentage points each year.

Couples have the option of one partner indicating a willingness to go unmatched at a certain rank on the rank order list if the partner matches to the program that is linked to that rank. Table 14 shows the number of couples matched with this option in the *One Matched* column (36).

**TABLE 14**

## NRMP PROGRAM RESULTS 2006 MATCH

*NRMP Program Results* lists every hospital that participated in the Match, along with the number of positions offered and filled for each of the institution's programs.

Hospitals are arranged alphabetically within state. The listing includes the hospital name (abbreviated in some instances); the program code, which identifies each program; the quota (the number of positions offered by the program); and the number of applicants matched with that program.

There are three reasons why a program that ranked an adequate number of applicants did not fill its quota: the applicants preferred other programs having vacancies; the applicants did not rank the program; or the applicants had withdrawn from the Match.

There are also three reasons why applicants may not be matched with their most preferred program: the program was filled with applicants it preferred; the program did not rank the applicant; or the program had withdrawn from the Match.

The following types of programs are offered through the NRMP:

- Categorical (C) positions are positions in programs that expect applicants who enter in their first post graduate year to complete the training required for certification in that specialty, provided their performance is satisfactory. Categorical programs in primary care medicine and primary care pediatrics are designated by (M) to distinguish them from regular medicine and pediatrics programs.
- Preliminary (P) positions are for one or two years of training as prerequisite for entering advanced positions in specialty programs that require one or more years of broad clinical training. Internal medicine, surgery, and transitional programs commonly offer preliminary positions.
- Advanced (A) positions (to begin in 2007) are positions in specialty programs that begin after completion of one or more years of preliminary training. Applicants without prior graduate medical education can apply for those positions while also applying for preliminary positions (to begin in 2006) that are compatible with their plans.
- Physician (R) positions are PGY-2 positions starting in the year of the Match that are reserved for physicians who have had prior graduate medical education. Physician positions are not available to U.S. senior medical students.

### **NRMP Program Code Structure**

The NRMP program code is a **9-character** code based on the following criteria.

- The **first four characters** are the Institution Code.
- The **fifth through the seventh characters** represent specialty code obtained from the **first three digits** of the program's **ACGME Code** and designates the specialty.

- The **eighth character** represents the program type:
  - ✓ **P** – Preliminary program
  - ✓ **C** – Categorical program
  - ✓ **M** – Primary program
  - ✓ **A** – Advanced program
  - ✓ **R** – Physician program
  - ✓ **F** – Fellowship program
- The **ninth character** represents the track
  - ✓ 0 – first program/track in the specialty and program type at the institution
  - ✓ 1 – second program/track in the same specialty and program type at the same institution (i.e. 34<sup>th</sup> Street Clinic)
  - ✓ 2 – third program/track in the same specialty and program type at the same institution (i.e. Rural Clinic)

**Examples**

Institution: **2071** – Contra Costa Reg Med Ctr

ACGME Number: **120-05-31-050** – Family Medicine

Program Type: **C** – Categorical

First Track: **0** – Martinez

**Program Code:** **2071120C0**

Second Track: **1** – Pittsburgh

**Program Code:** **2071120C1**

Second Track: **2** – Richmond

**Program Code:** **2071120C2**
